ORTHOPEDIC SURGERY SOLUTION

PRECISION | INNOVATION | TRUST

Electrosurgical
support in joint
and bone procedures

Upspring Medical

At Upspring Medical, we are committed to delivering cutting-edge surgical solutions to the Turkish & global healthcare sector. Established in Ankara in 2024, our office is officially registered as a Medical Sales Center under the Sincan District Health Directorate and listed in the ÜTS system. Following full regulatory approval in April 2025, we launched nationwide operations, combining global manufacturing excellence with local expertise to provide reliable. high-performance solutions.

Our products are manufactured through a strategic partnership with Promed Supply Co., Ltd., a Hong Kong-based leader in electrosurgical innovation since 1997. Promed operates ISO 13485 and CE-certified facilities in China, ensuring top-tier quality, full compliance, and global production standards.

Precision. Innovation. Trust

Delivering Globally Reliable Electrosurgical Solutions

Local Commitment with Global Expertise

At Upspring Medical, we leverage our global manufacturing expertise to deliver exceptional quality and service to the Turkish & global market. By combining Promed's international production strength with localized support, we offer tailored solutions and responsive service to meet the needs of Turkish & global distributors and healthcare professionals.

End-to-End Manufacturing & Reliable Supply Chain

Promed supply oversees the entire production process from raw materials to final sterilized packaging ensuring **full traceability, consistent quality**, and **on-time delivery**.

Comprehensive Electrosurgical Solutions

◆ Electrosurgical Pencils (Disposable & Reusable) & Bipolar Forceps

◆ Specialty Electrodes (General, LLETZ, Micro, Arthroscopic) & Grounding Pads & Cables

◆ Laparoscopic Instruments & Electrodes & Skin Staplers & Removers

◆ Smoke Evacuation Systems (Pencils and Forceps)

These solutions support a wide range of surgical specialties

◆ From **General Surgery** to **Gynecology, Aesthetic**, and **Abdominal procedures**

◆ Ensuring precision, safety, and performmance across every operation.

TABLE OF CONTENTS

ORTHOPEDIC SURGERY SOLUTION

Electrosurgical support in joint and bone procedures

Disposable Electrosurgical Pencil
Power At Your Fingertips

- Equipped with stainless steel and Teflon-coated blade to reduce tissue adhesion.
- Lightweight, ergonomic design with push-button activation for precise control.
- Universally compatible with ⌀2.36mm electrodes and most ESU generators.
- Offered with 3m or 5m flexible cable options for enhanced maneuverability.
- CE-certified and rated for up to 5 kVp accessory voltage.

Disposable Electrosurgical Pencil

- Fit for with ⌀ 2.36mm Electrode (Stainless Steel / Teflon Coated Blade).
- Sterile Packing
- Packing:10pcs/Box

Disposable Microfin Electrosurgical Pencil
Exceptional Precision for Micro-Electrosurgery

Cut and coagulation buttons are conveniently positioned near the surgical site for improved control, precision, and smooth electrode handling.

Compatible with ultra-fine ∅1.6mm electrode for superior surgical precision.

Lightweight, compact design for easy handling and reduced fatigue.

PD833W - ∅ 1.6MM

PD833 - ∅ 2.36MM

Compatible with standard ∅2.36mm electrodes for versatile surgical applications.

General Disposable Electrode
Safe & Efficient Energy Transmission

Promed's disposable electrosurgical electrodes—offered in blade, needle, and ball shapes—deliver precise cutting and coagulation. Available in various lengths with stainless steel or Teflon-coated shafts, and in over-molded or shrink-wrapped designs, they are fully compatible with standard monopolar pencils, ensuring accuracy, control, and dependable performance in every procedure.

Disposable Arthroscopic Electrode
Flexible & Focused energy for Arthroscopy

Promed Arthroscopic Electrodes are designed for cutting and coagulating soft tissue in arthroscopic procedures. Compatible with ⌀2.36MM shaft electrosurgical pencils, they are disposable and available in various tip configurations for use with irrigating solutions.
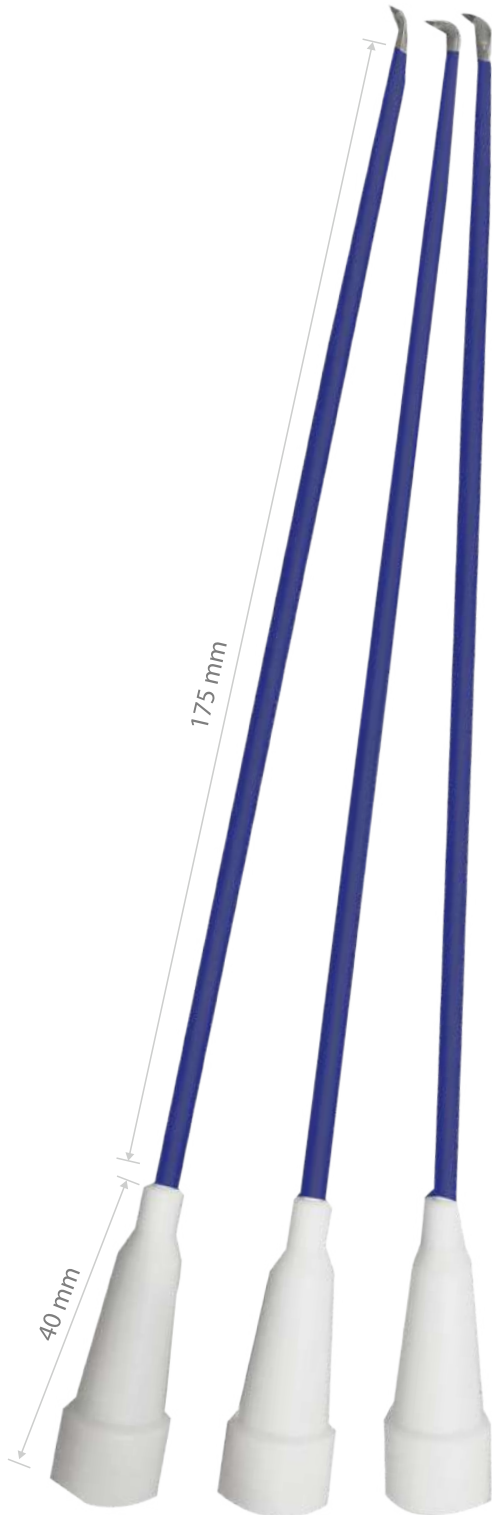

Insulation extends to the electrode tip, ensuring precise and controlled energy delivery.

The transparent insulation enhances the surgeon's visibility of the electrode tip for improved precision.

The stabilizing cap ensures a secure, safe connection between the electrode and pencil operation.

Compatible with Promed's PD702 pencil for easy conversion.

Disposable Ground Pad & Cable
Skin-Friendly · Single-Use · Burn-Reducing

Promed's Disposable Grounding Pad offers safe, reliable grounding during electrosurgery. Its soft foam and hydrogel ensure secure, comfortable adhesion while optimizing energy transfer. Skin-friendly, single-use, and burn risk-reducing.

Telescopic Smoke Evacuation Pencil
Slide-To-Extend Technology For Complete Surgical Control

SmokeFin

Smart · Clear · Ergonomic · Disposable

● **Enhanced Ergonomics**
Lightweight with 360° swivel and flexible tubing.

● **Slim, Oval Triangular Grip**
Ensures improved access and visibility.

● **Rocker Switch with Sliding Button**
Telescopic design that slides along the housing for quick adjustments.

● **Slide-to-Extend up to 60mm**
By pushing the button forward, the housing can extend up to 60mm to reach deeper into surgical cavities.

● **Efficiency Smoke Clearance**
Rapid removal of surgical smoke to maintain a clear operating field.

68MM-198MM

● **Adjustable Length**
The distance between the sliding button and electrode tip smoothly extends from 68MM to 198mm.

Hassle-free work-length adjust

Full extension

60mm

Pushing the button forward extends the electrode tip, while pulling it backward shortens the reach for precise control.

Upspring

Upspring BRI Corp.Medical Ltd. | sales@upspringpurification.com | www.upspringmedical.com

Adjustable Reach, Efficient Smoke Evacuation

The SmokeFin Telescopic Smoke Evacuation Pencil features a sliding button that enables surgeons to instantly adjust the working length from 68mm to 198mm without changing the electrode. Its innovative telescopic mechanism ensures seamless adaptation during procedures, providing superior visibility, enhanced ergonomics, and effortless control.

▲ **With common ES Pencil**   ▲ **With SmokeFin**

# Features

Available in Both Bipolar and Monopolar Configurations
Both Bipolar and Monopolar configurations are available catering to different needs.

Smoke Evacuation
Extracting hazardous surgical smoke at the tip of the forceps with incorporated smoke tube.
Non·Evacuation monopolar forceps is also available.
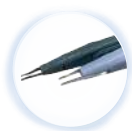

Hand Activation Control
Completely hand-activated control by squeezing and holding the buttons on the sides;
Footswitch is not necessary during surgery.

Flexible Tubing and Lightweight
Reducing the operator fatigue while maximizing the flexibility by the integration of smoke tubing with 360° swivel connection.

Tips with Optional PTFE Coating
Reducing the risk of building up eschar on the tips and delivering reliable electrosurgical performance.
PTFE coating is available in Monopolar Forceps to eliminate tissue adhesion further.
